CONCENTRATION

4'x4' CONCENTRATION SUITE

Zonez 4x4 Concentration STC42 Privacy Suites are free-standing units providing single users high levels of visual and acoustical privacy for their conversations in open-office environments.

Constructed of best-in-class sound insulation and sound-absorbing materials, the 4'x4' Concentration Suite's engineered wall system blocks outside noise, making external conversation and other sounds barely audible. Users are able to collaborate and accomplish business objectives without distraction.

- STC 42: Keep your concentration level high and your conversations private.
- Engineered ventilation fan allows continuous air flow while you work.
- Automatic motion sensor lights keep you energy-efficient and out of the dark.
- Built-in power outlets and USB ports ensure your devices stay charged.
- Automatic, self-closing door keeps your ideas in and noisy disruptions out.

8'x4' CONVERSATION SUITE

The Zonez 8'x4' Conversation Suite is a purpose-built, private meeting solution. Ideally suited for two, this thoughtfully designed suite provides a quiet collaboration space for your next one-on-one meeting.

The suite is designed to eliminate outside disturbances by insulating the occupants from unwanted noise by way of a proprietary, sound-dampening wall system. In conjunction with the insulated door frame and dual-pane windows, the suite's engineered wall system achieves an STC sound rating of 42, making outside conversation and other noises barely audible. Users are able to collaborate and accomplish business objectives without distraction.

- Three ceiling options provide users the flexibility to match their suite with local fire suppression ordinances.
- Dual pane windows keep sound out while providing a sense of spaciousness.
- Door and window channel seals are insulated to prevent sound infiltration.
- Comprehensive, 10-year warranty.
- All units are shipped ready to be assembled on-site.

10'x10' COLLABORATION SUITE

The Zonez 10'x10' Collaboration Suite is a stand-alone privacy suite that accommodates up to six occupants. The spacious suite gives users a private space to collaborate, away from the distractions usually associated with an open office.

This versatile suite can be constructed with three different ceiling configurations; an STC 42 ceiling that is built with three layers of sound abatement materials ensures a peaceful teamwork venue, while a melt-away ceiling tile or an open grid configuration is ideal when conforming with local fire suppression regulations.

- Three ceiling options provide users the flexibility to match their suite with local fire suppression ordinances.
- Dual pane windows keep sound out while providing a sense of spaciousness.
- Door and window channel seals are insulated to prevent sound infiltration.
- Comprehensive, 10-year warranty.
- All units are shipped with seismic flooring anchoring kitsready to be assembled on-site.

ENGINEERED FOR THE REAL WORLD

Zonez Privacy Suites is a division of Allied Modular Building Systems. With over 30 years of experience in the modular construction and cleanroom industries, Zonez entered the privacy booth market with a distinct advantage over the competitors with their roots in office furniture.

From the beginning, Zonez was able to engineer privacy suites that stood out from the pack. Understanding building code requirements and managing air exchanges in a small space, helped us to develop suites that comply with the strictest building standards and ensure a comfortable and quiet environment.

CEILINGS

Zonez Privacy Suites are the only privacy booths that allow for fire suppression. Users can choose from several ceiling configurations to ensure compliance with fire protection standards as well as supply HVAC to the suite.

Additionally, Zonez is the only phone booth design to adhere with the International Building Codes which require the interior ceiling height to be a minimum of 7' in height.

LOW PROFILE ENTRY

Zonez Privacy Suites provide ease of access through a low-profile threshold. Unlike some other privacy booths that require the user to set up as they enter the booth, Zonez suites are designed with ADA requirements in mind.

UL APPROVED RACEWAYS

Every piece of our suites is constructed to the highest standards. Our electrical raceways are UL approved to ensure the safest environment for our users.

The suites can be hardwired to your existing electrical system or simply plugged into the closest outlet.

COMFORT AND PRIVACY BY DESIGN

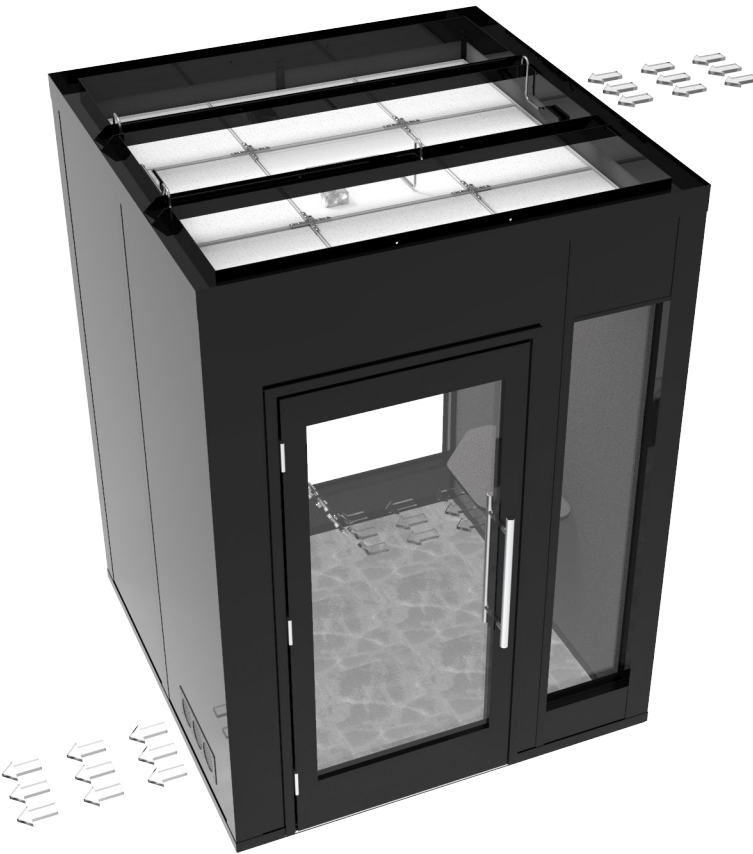

AIRFLOW

Drawing on our parent company's many years of cleanroom experience, Zonez suites are designed to maximize the number of air exchanges per hour (ACPH).

Each suite is designed with several commercial intake and exhaust fans. The fans are strategically positioned to ensure maximum intake and exhaust while still maintaining a barometric equilibrium inside each suite.

SOUND TRANSMISSION

Zonez privacy suites are designed to keep distractions out and your conversations in. Each suite meets an STC soundproofing rating of 42, meaning loud speech may be audible, but not understood.
